Note: + Inventory consumption spare part is the part which is worn out through processing directly on product. Example: CT cleaver blade on CT cleaver, Stripper blade on stripper HTS-12, electrode on splicer, Teflon heat of cerrocast pot... This kind of part is taken care by PRE/DES.

+ Critical spare parts are remaining kinds of spare part which does not process direct to change material/WIP form, or the back up parts recommended from maker or transferring side engineer through user guide, maintenance guide or discussion. Example: Bearing, sensor on polishing machine; relay, thermal controller on heater, Nest on cerrocast machine... This kind of part is taken care by PTE.
